## Core Learning Areas

Our curriculum focuses on two essential digital skills for the modern world

### Artificial Intelligence (AI)

-  What AI is and how it works
-  AI in everyday life
-  Responsible and ethical AI use
-  Using AI as a learning support tool

### Cybersecurity

-  Online safety and privacy
-  Identifying scams and phishing
-  Protecting personal data
-  Responsible digital behaviour

## Learning at School

Our step-by-step approach ensures effective and engaging learning experiences

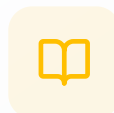

1

### Facilitators Visit Schools

Trained facilitators come directly to your school to deliver the program.

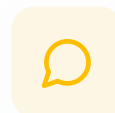

2

### Interactive Classroom Lessons

Engaging, student-centered sessions designed for secondary school learners.

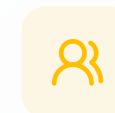

3

### Real-life Examples & Discussions

Practical scenarios and open discussions to reinforce learning.

4

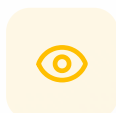

### Student Activities & Group Work

Collaborative exercises that encourage teamwork and critical thinking.

## Why Teen Tech Matters

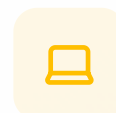

Equipping students with the knowledge and skills they need for a digital future

Digital Awareness

Online Safety

Responsible Technology Use

Future-Ready Skills

Students learn to understand and critically evaluate digital technologies and their impact on society.

Home

Essential skills to protect themselves and their personal data in the digital world.
